Cries

We are very sad to report that one of our long time members and a good friend of the RSVC passed away this summer. Edyth was very active in the field of obedience and for several years when we held our obedience classes - every Tuesday night - Edyth and Chuck were there to instruct old and new members alike. They loved the dogs and remembered them all by name. Edith and Chuck also were our Show Stewards for many years and we always knew that we could depend on them. Our sympathy to Chuck Kraus (Edyth's husband) and to Edyth's family and friends.

We regret to announce the passing of Robert Mather, husband of Rose Mather, father of Rita Mather, on September 23. Our thoughts and prayers are with their family.

VERSATILITY AT MORMON LAKE

We had a light turn out for Versatility the weekend of July 17 & 18. The weather was beautiful and we had a great time! My thanks to our judges -- Christine DeWoody, Amy Pongratz, and myself. Just a reminder to all of you -- make sure you keep a list of your passes and the judges that pass your dog. You can't pass twice under the same judge in a category. I'd also like to thank Jim DeWoody for bringing up the birds and to our gunners.
(I apologize that I don't remember who gunned for Versatility each day.)

We will have a Conformation and Obedience Versatility on October 30th after our Specialty and during our Family Picnic. This will all be at Paradise Valley Park, 40th Street north of Bell Road in Phoenix. So... mark your calendar now!
Let's give the following dogs and their owners a big hand for their passes!

ARE YOU A MEMBER OF THE VIZSLA CLUB OF AMERICA, INC.

Now's the time to join and get involved in your national club, join before the end of the year and you could receive a VCA medallion for each title earned by your dog.. Remember changes made by the nationals club effect us all in our breed. You must be a member to vote on breed standard changes and other proposals. Deborah will have applications at the Specialty. See one of your RSVC members for sponsorship.

President's Message

It's hard to believe - but September is here already. I hope that everyone had a great summer.

Here we go again!!

Your board met on September 9 and plans are in full swing for the next few months of activities. **Please refer to the Calendar of Events for all the great activities that are being planned.** We are a very active Club and try to keep you informed of what is going on from month to month. It will really be a great help if you will respond to the appropriate chairman of our events if you plan to attend a function. So often we have to telephone many of the members to get an accurate count and it would be so much easier if you would contact us. And of course - pay attention to closing dates if they apply to an event.

Thanks again to everyone who volunteers to help. We had a very successful Hunt Test in August and look forward to our Fall Specialty. Plans are underway to help you learn how to get your dog ready to show so make sure you check the website frequently to find out when these classes will be held.(www.rsvc.net)

Please keep your newsletter close by so you can refer to it. There is a lot planned and we look forward to having great participation.

And don't forget - if you would like to help in any way please let us know. This is your club and we can always use extra help.

Marge Mehagian
President

The Dog Days of Summer

Everyone knows that the “dog days of summer” occur during the hottest and muggiest part of the season. Webster defines “dog days” as...

1. The period between early July and early September when the hot sultry weather of summer usually occurs in the northern hemisphere
2. A period of stagnation or inactivity

But where does the term come from? Why do we call the hot, sultry days of summer “dog days?”

In ancient times, when the night sky was unobscured by artificial lights and smog, different groups of peoples in different parts of the world drew images in the sky by “connecting the dots” of stars. The images drawn were dependent upon the culture: The Chinese saw different images than the Native Americans, who saw different pictures than the Europeans. These star pictures are now called constellations, and the constellations that are now mapped out in the sky come from our European ancestors.

They saw images of bears, (Ursa Major and Ursa Minor), twins, (Gemini), a bull (Taurus), and others, including dogs, (Canis Major and Canis Minor).

The brightest of the stars in Canis Major (the big dog) is Sirius, which also happens to be the brightest star in the night sky. In fact, it is so bright that the ancient Romans thought that the earth received heat from it. Look for it in the southern sky (viewed from northern latitudes) during January.

In the summer, however, Sirius, the “dog star” rises and sets with the sun. During late July Sirius is in conjunction with the sun, and the ancients believed that its heat added to the heat of the sun, creating a stretch of hot and sultry weather. They named this period of time, from 20 days before the conjunction to 20 days after, “dog days” after the Dog Star.

The conjunction of Sirius with the sun varies somewhat with latitude. And the “precession of the equinoxes” (a gradual drifting of the constellations over time) means that the constellations today are not in exactly the same place in the sky as they were in ancient Rome. Today, dog days occur during the period between July 3 and August 11. Although it is certainly the warmest period of the summer, the heat is not due to the added radiation from a far-away star, regardless of its brightness. No, the heat of summer is a direct result of the earth's tilt.

IN PREPARATION FOR UPCOMING HUNT TESTS WE ARE SCHEDULING THE FOLLOWING TRAINING SESSIONS FOR JUNIOR LEVEL DOGS ONLY!!!!
